KRUCHININ GRIGORII

Budva, Montenegro (ready for relocation)

 @kga_93   gkruchinin75@gmail.com   linkedin.com/in/grigoriy-kruchinin   github.com/GrigoriyKruchinin

Preferences

- I am considering offers for the position of Python Developer.
- Comfortable work format (office/hybrid/remote).

Technical Skills

Languages: Python, SQL, HTML/CSS basic
Frameworks: Django, DRF, Flask, FastAPI, aiogram, Pytest, Bootstrap
Technologies: Django ORM, SQLAlchemy, MVC(MVT), Docker
DMS: SQLite, PostgreSQL
Tools: Poetry, Git, Swagger, VsCode, Jira

Experience

Startup: aggregator of events in Thailand   2023 - now

- Managed the development of the backend part on Django and Django Rest Framework as part of a team of six people, which led to increased team productivity and improved the quality of the final product   .
- Designed the administrative dashboard, which greatly simplified the data management process and improved team efficiency.
- Customized automatic documentation generation using Swagger, which reduced the time to make changes and simplified interaction with the API.
- Localized the project into four languages: Russian, English, Thai and Chinese, thus ensuring the scalability of the project.
- Implemented GPT-agent to generate data translations, thus automating and speeding up the translation process.

Hexlet internship | *Task Manager, Page analyzer, Gendiff, Brain Games, Wedding bot*   2022 - 2023

- Automated data parsing on web pages using BS4 library, which reduced the time to collect and process information, improving application performance.
- Applied ORM to interact with databases in a reliable and stable manner, ensuring secure storage and processing of information.
- Worked with tree recursion to analyze differences between files, providing quick change detection and improved data processing quality.
- Using Pytest, wrote automated tests to ensure high code quality and minimize bugs, which improved application reliability.
- Realized successful connections to third-party APIs, extending application functionality.

Education

Hexlet Online Programming School	**2022 − 2023**
Python Developer	*Russia*
Nizhniy Novgorod State University of Architecture and Civil Engineering	**2011 − 2015**
Bachelor of Construction	*Nizhniy Novgorod, Russia*

Educational courses

Fundamentals of algorithms | Yandex Education
Quick Start in FastAPI Python | Stepik
Agile project management | Skillbox
Jira | Acses.Media

Background

Lead Engineer	**2016/2018 − 2022**
FKU Uprdor Severo-Zapad	*Saint Petersburg, Russia*

- ∗ Supervised the state contract for the maintenance of the federal highway A-118 Ring Road.
- ∗ Introduced an innovative technology for the use of composite noise shields.
